

22nd January 2020

New JIG 1/2 and JIG 4 Checklists to be released in FOS

If you have any queries or
comments regarding the
release of the new checklists,
please contact JIG Technical
Manager, Antonis
Christodoulakis:

antonis.christodoulakis@jigonline.com

JIG are pleased to announce that updated versions of its JIG 1/2 and JIG 4 checklists will be released in JITS/FOS on 23rd January 2020. Please note that this Newsflash is principally intended for JITS users with Inspector, Site Manager and Area Manager access rights.

Please be aware of the following important information which is particularly relevant to JIG Inspectors:

- Going forward, all JIG inspections in JITS/FOS system which are progressed from status "Unscheduled" and/or "Scheduled" to status "In Progress" will be brought in the system against the new versions of the JIG 1/2 and JIG 4 checklists, named Ver. 12.2 Jan.20 and Ver. 3.2 Jan.20 respectively.

- Existing inspections with status "In Progress" which have been edited by inspectors at least once prior to this system release, will appear with the previous JIG 1/2 or JIG 4 checklist versions and will be completed using that version. Please note that it is acceptable to complete an inspection using the version that was in use when the inspection was started. For these inspections, the inspectors are requested to not press the "Reverify" button.

Both checklists have been extensively reviewed and updated by the JIG Standards Working Group (SWG) and the JIG Operations Committee. The main objectives of this interim update are listed below:

- Improve alignment with current JIG standards, where/as necessary
- Reflect updated requirements introduced via recent JIG Bulletins
- Improve clarity of some questions – considering also feedback from JIG Inspectors
- Emphasize critical checks linked to JIG Bulletins (such as those associated with Bulletin 105) or industry incidents/events
- Improve consistency between the recently updated EI/JIG 1530 Inspection checklist and the two airport checklists (JIG 1/2, JIG 4)
- Include additional checks that are not currently covered in the checklist but frequently raised by inspectors in the "Other" sections
- Incorporate feedback from JIG Inspector Workshops and analysis of inspection findings (from FOS)

A PDF with tracked changes is available if required. Please contact JIG Administration Coordinator, Sam Neal, to request this: sam.neal@jigonline.com
